Anuranjan Shrivastava

Software Engineer | Full-Stack (React / Next.js / Node.js)

s.anuranjan.shrivastava@gmail.com • +91 83199 18906 • Hyderabad, India • LinkedIn

SUMMARY

4 years of experience building scalable React and Next.js web application across multiple domains, including integration software, E-commerce and product customization. Delivered measurable impact including 82% vendor conversion, 60% UX improvement and 50% faster search performance. Experienced in full-stack development (Node.js, REST APIs), team leadership and production ownership.

TECHNICAL SKILLS

Frontend	React.js, Next.js, TypeScript, JavaScript (ES6+), Redux/RTK, Zustand, React Query, HTML5, Webpack, Lighthouse, Jest, React Testing Library
Styling / UI	Tailwind CSS, SCSS, SASS, Styled Components, Material UI, Chakra UI, Ant Design, Shadcn
Backend / APIs	Node.js, Express.js, REST APIs, JWT, RBAC, MongoDB, PostgreSQL
Versioning	Git, GitHub, GitLab, Vercel, Netlify
AI Tools	ChatGPT, Claude, Cursor, GitHub Copilot

PROFESSIONAL EXPERIENCE

Bacancy | Hyderabad, India — 13-05-*2025 – Present*

Software Engineer (Full Stack)

- Developed and maintained scalable frontend features using React.js, Next.js, TypeScript, and Zustand, focusing on performance optimization, clean architecture, and reusable component design.
- Led Next.js upgrade and React 19 migration, resolving build/runtime issues, refactoring legacy components, and adopting modern React patterns to improve performance and code quality.
- Managed production releases and hotfixes, handling branch synchronization, PR-based merges, environment configuration, and debugging critical staging and production issues.
- Collaborated closely with cross-functional teams (backend, product, and design) to translate business requirements into scalable technical solutions, improving delivery efficiency and overall user experience.

Lucent Innovation | Ahmedabad, India — 14-06-*2023 –11-04-2025*

Software Engineer

- Re-engineered My Easy Monogram (React + Node.js) — 82% vendor conversion from 1,000+ vendors in 3 months, built 2D canvas Design Studio with real-time previews.
- Leveraged Redux for efficient state management and integrated Ant Design to build consistent, scalable UI components, while optimizing performance through memoization, lazy loading, and reducing unnecessary re-renders.
- Led Breathing AI UX redesign — 60% improvement in user feedback and mentored 3 junior developers.
- Built Shopify Polaris inventory alert system (React/Redux) — 25% conversion uplift, 30% retention boost.

MAQ Software | Noida, India — 11-07-*2022 –31-03-2023*

Software Engineer

- Built responsive React.js UIs — 25% engagement boost, 15% conversion lift, 30% faster load times, 20% mobile traffic growth.
- Improved state management via Context API and React Router, enhancing application stability and increasing user retention by 10%.
- Collaborated with UI/UX designers to translate Figma wireframes into pixel-perfect, cross-browser compatible interfaces, reducing design-to-dev handoff time by 20%.

EDUCATION

B.Tech in Computer Science & Engineering — *2018 – 2022*

Government Engineering College Bilaspur | CSVTU University, Chhattisgarh

ACHIEVEMENTS & RECOGNITION

- Praised by clients for delivering exceptional UI designs and seamless user experiences consistently across projects.
- Clients recognized ability to deeply understand and implement new technologies, bring quality troubleshooting and brainstorming, and demonstrate dependability and team orientation.
- Trusted with end-to-end production release ownership — hotfixes, branch management, and live debugging; acknowledged for taking leadership and co-leadership roles when needed.
